***Allowable Subject Matter***

5. The following is an examiner's statement of reasons for allowance:

As applicant pointed out under Brief section, pages 20-22, Lewallen (US 6,854,123 B1), taken either singly and/or in combination with other cited prior arts, do not teach the combined functional limitations of receiving, by the platform-independent data superstructure, from a device-native operating system via communication with the superstructure-dedicated operating system, at least one application event generated by an execution of the instantiated application and representative of an update to the application state of the application; updating, by the platform-independent data superstructure, information in a first segment of the platform-independent data superstructure associated with the at least one application event, responsive to receiving the at least one application event and independent of an update to a second segment in the platform-independent data superstructure; updating, in accordance with the superstructure segment update, the application state of the executing application on the device, wherein updating information in the segment of the superstructure further comprises: receiving data representative of the at least one application event in the superstructure dedicated operating system; and applying to the superstructure, in response to the received data, a data object, thereby modifying the superstructure, as recited in such manners in each of independent claims 1, 21, 38 and 91.

Prior arts of record do not teach and/or suggest these claimed limitations, thus, all remaining pending claims 1, 3-13, 15-48, 50, 52, 70-73, 75-87, 89 and 91-108 are allowed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
